Designer of Smiles has proudly served the Huntingdon Valley community for over 39 years, providing comprehensive family dental care for patients of all ages. Founded by Dr. Steven C. Bunting, the practice is built on treating every patient as a valued member of their dental family with compassion, honesty, and excellence.

After beginning in the Holy Redeemer Hospital Medical Office Complex, they relocated in 2005 to their more welcoming office at the corner of Huntingdon Pike and Byberry Road. "Designed to feel more like a home than a medical office, our practice offers convenient parking, wheelchair accessibility, and a comfortable environment where patients can feel at ease," Dr. Steven shares.

While they provide complete general dentistry for the entire family, they are especially recognized for their expertise in cosmetic and reconstructive dentistry, including smile makeovers and full-mouth rehabilitation with dental implants. "Helping patients regain healthy, confident smiles is one of the greatest rewards of our profession," Dr. Steven boasts.

The practice is proud to announce the addition of Eric S. Bunting DDS, MS joining the practice. Dr. Eric is the son of the practice owner Dr. Steven C. Bunting. With the addition of Dr. Eric, the legacy of the practice will continue for years to come.

"I plan to continue to extend my gratitude to my patients at Designer of Smiles, and our long term experienced dental team I get to work with. Looking forward to a great career ahead and being of service to all I meet," Dr. Eric remarks.

Dr Bunting and team have been serving our patients for over 35 years. Visit designerofsmiles.com to learn what keeps our patients smiling.
